Axis Communications Academy

Axis Network Audio: Essentials

Axis Network Audio: Essentials is a comprehensive foundation course on network audio. This training is hands-on — Students will gain firsthand experience with Axis network audio speakers as they learn the fundamentals of audio and the science of sound. Students will learn how to install, configure, and operate network audio devices in standalone mode as well as in conjunction with network cameras. This course is ideal for installers, technicians, and end-users of network audio devices.

This course is comprised of an assigned reading and a 1-day classroom training. Students will complete the assigned reading at their own pace before attending the classroom portion. At the conclusion of the training, students will take the test for Audio Essentials certificate of completion to test their skills and prove their knowledge.

Upon completion of this course, you'll be confident in:

> Coordinating devices, such as having a speaker play an announcement based on a camera event

> Scheduling music or announcements

> Utilizing audio analytics to cue audio or video events

> Assessing space layout and acoustics to plan an appropriate network audio solution

> Describing the science behind sound, such as sound pressure, decibels, pitch, sampling frequency and bit depth

6 BICSI credits

*AVIXA Credits
amount pending

Length:
> Read Technical Guide to Network Audio before class
> 1-day hands-on classroom work

Prerequisites:
Registrants will be required to read the Technical Guide to Network Audio at their own pace prior to class.

Who should attend?
Security professionals who want to integrate network audio into their services.

Price: $299

Fully paid attendees will receive an AXIS C1310-E Network Horn Speaker.
