

Axis Communications Academy

Building End-to-End Solutions with AXIS Camera Station Integrator Suite

Helping your customers discover the blueprint for business success and increased security starts by first understanding the full scope of their surveillance needs. This is simplified with AXIS Camera Station Integrator Suite and tools that allow for easy system design, installation, configuration and maintenance.

This hands-on course is perfect for system installers, technicians designers and salespeople who need to learn how to create an effective mid-size system. Students will use AXIS Camera Station Integrator Suite to create an all-in-one solution through hands-on exercises integrating the AXIS T85 PoE+ Network Switch Series, AXIS A8105-E Network Video Door Station, network speaker, I/Os and action events.

You'll leave the classroom confident in:

- > Designing and configuring site solutions using AXIS Site Designer
- > Testing deployed solutions with AXIS Installation Verifier
- > Tailoring AXIS Camera Station for a customer's specific needs
- > Using AXIS Camera Station Integrator Suite to manage systems

Length: 1 day blended classroom with online prerequisite

Who should attend?

Professionals who will support, install, configure, sell or manage a complete solution built from Axis products.

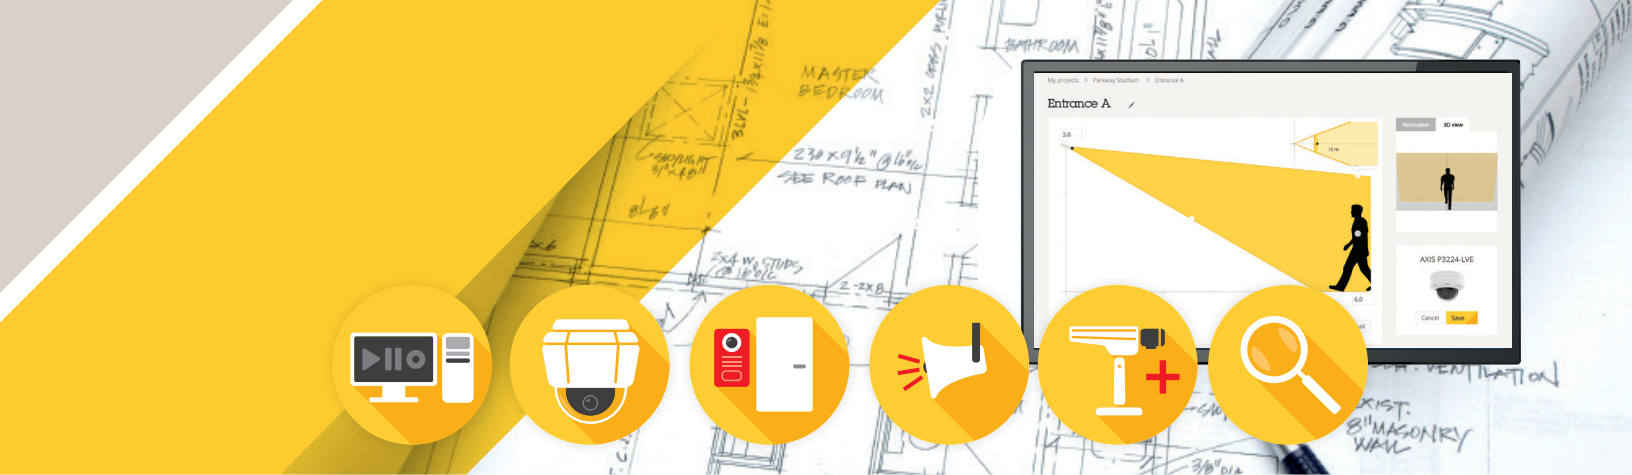

Prerequisites:

Complete the AXIS Camera Station online course.

Price: \$299

**Paid attendees will receive
16 AXIS Camera Station licenses!**
