

Optional M12-mount lenses

Greater flexibility for specific surveillance needs

Axis network cameras are equipped with carefully selected lenses to provide the best possible performance and durability. M12 lens option offers great flexibility for specific surveillance needs. The different properties enable a variety of areas of use, from wide area coverage to in-detail focus closeups – all with maintained image quality. The match between a lens, the image sensor is crucial to ensure the optimal camera performance. Therefore choosing the best lens option is of great importance for the quality of the surveillance. These M12 lenses are specifically adapted for onboard placed cameras.
