1. Introduction

This guide helps you to prepare for Axis Network Video Exam. It includes the following topics:

- > What is Axis Certification Program?
- > Exam details
- > Recommended exam preparation

2. What is Axis Certification Program?

The purpose of Axis Certification Program is to help individuals and companies prove their competence and skills in network video surveillance.

Who should take Axis Network Video Exam?

The certification is open to anyone looking to show their competence and skills in network video. The exam has been developed specifically for system designers and professionals in technical sales roles.

For how long is the certification valid?

The certification is valid for 36 months. Through regular recertification, you can extend it by 36 months at a time.

What are the benefits of being an Axis Certified Professional?

- > Axis Network Video Exam is a comprehensive knowledge indicator of the latest network video technologies, solutions, and best practices.
- > Axis Certified Professionals are highly regarded by their peers and colleagues for their competence. They are recognized by system architects and consultants who are specifying Axis Certified Professionals in large projects.
- > Axis certification is a unique differentiator for customers when selecting their video surveillance integrator.
- > Upon certification, you receive:
 - Axis Certified Professional certificate
 - Axis Certified Professional logo

Having Axis Certified Professionals on staff is a requirement to become an Axis Solution Partner.

3. Exam details

Axis Network Video Exam is an advanced computer-based test offered at Pearson VUE test centers and online via OnVUE at the price of \$150 USD.

Axis Network Video Exam is available in selected countries at test center, but globally online via OnVUE. For more information visit www.axis.com/learning/certification-program

To find the closest Pearson VUE test center or to register for online testing, please visit

<https://home.pearsonvue.com/axis>

Practical information

How do I schedule an Axis Network Video Exam at a test center?

There are three options for scheduling a test appointment at a test center.

- > Online at <https://home.pearsonvue.com/axis>
- > On-site at your local test center
- > Contact Pearson VUE customer service

How do I schedule an online Axis Network Video Exam?

- > Online at <https://home.pearsonvue.com/axis>

What information should I be prepared to provide when I schedule my exam?

When you schedule your appointment, you should be prepared to provide the following information. The personal information you state will be used for creating your certificate.

- > The name used to schedule your appointment must exactly match the name shown on your identification on the day of your exam. At a minimum, the identification must be a valid, government-issued ID that shows your name in the English alphabet, your signature, and a photo of you
- > Your Pearson VUE candidate ID, if you have one
- > Phone numbers - If there is a problem, we will use these numbers to reach you
- > Mailing address - Provide the address to which you would like your membership mailed
- > Exam code - ANVE
- > Email address - Correct email information is required for registration
- > Method of payment (<https://home.pearsonvue.com/axis>)

What identification is required on-site at the test center?

For Axis Network Video Exam in the test center you must have two valid forms of ID, one with a photo and both with your signature. Forms of primary ID must be original, non-expired (valid), photo-bearing, signature-bearing, and government-issued.

Please visit <https://home.pearsonvue.com/axis> for more details.

What identification is required online with OnVUE?

For Axis Network Video Exam online, you must have one ID, with a photo and your signature. It must be original, non-expired (valid), photo-bearing, signature-bearing, and government-issued.

Can I reschedule or cancel my appointment?

For the test center appointment, you can cancel or reschedule your test appointment through the Pearson VUE website until 48 hours before your appointment. For the online test you can cancel or reschedule up until one hour before your appointment. If you do not cancel or if you arrive late, you will have to forfeit the test fee. This includes all types of payment such as credit card, voucher, and cash.

Axis Network Video Exam details

- > Exam title: Axis Network Video Exam
- > Number of test questions: 70 exam questions
- > Test duration: 90 minutes (maximum)
- > The exam timer does not start until you view the first exam question
- > Certification: Axis Certified Professional
- > You may not access any resources or references during the exam
- > You will be required to show identification before taking the test

Question types on the test

- > Multiple choice
 - Single answer
 - Multiple answer

What is a score report?

After you have finished the exam, you can sign into the Pearson VUE website and view your score. The score report includes information about whether you have passed or failed the exam and an indication of your performance per knowledge area. There will be no detailed information about passed or failed questions.

Calculation of the exam score

The passing score for Axis Network Video Exam is 600 points out of 800. The score is scaled, starting at 200 points. The score per question depends on importance and difficulty level. If you fail one of the alternatives, or do not answer all, you will get 0 points. No points are deducted for incorrect answers or unanswered questions.

4. Recommended exam preparation

Prepare

In order to pass the test, it is important that you are well prepared. Axis Communications Academy offers a broad learning portfolio, including everything you need to know to pass Axis Network Video Exam. To best prepare for the exam, register for the [Network video fundamentals](#) course and familiarize yourself with the [Technical guide to network video](#). These training materials serve as valuable educational resources to gain the necessary knowledge and skills. We also recommend hands-on experience with the technology.

The exam is based on knowledge in the eight areas presented below.

Axis product knowledge

Axis product knowledge questions are designed to test your overall knowledge of the Axis product portfolio. This includes familiarity with the Axis naming convention, product types, features, capabilities, and available accessories.

- > Axis naming convention
- > Camera types and typical use cases
- > Extended video products

Camera elements

The video a camera produces is the result of numerous components. Camera elements include questions regarding imaging - How does a camera see?

- > Optics and lenses
- > Photographic elements
- > Camera components

Electromagnetic radiation

Electromagnetic radiation refers to what a camera sees, including visible light, infrared light, and thermal radiation and explores how they influence applications.

- > Color management
- > Camera features
- > Lighting technology
- > Thermal imaging and technology

Video compression

Various video compression formats are compared, focusing on their underlying principles and benefits.

- > Bitrate and bandwidth
- > Compression
- > Bitrate influencers
- > Video codecs

Networking and cybersecurity

Network video systems rely on various devices and software configurations to get video from source to destination. Security aspects focus on measures to block unauthorized users from the network.

- > Basic networking
- > Cybersecurity

System design

System design takes into account all that must be considered in order to fully design a network video surveillance solution.

- > Design considerations
- > Operational requirements
- > Axis system design tools

Installation and troubleshooting

Installation questions reflect a general understanding of basic installation considerations during the system design process. This includes, for example, software usage, hardware installation, focusing techniques and maintenance.

- > Installation tools and features
- > Mounts and accessories
- > Troubleshooting and resources
- > Recognizing common issues

Integration

Integration questions assess knowledge of enhancing a network video system through integration between different devices and technologies.

- > Video encoders
- > Video management software
- > Analytics

The score report includes information about whether you have passed or failed the exam and an indication of your performance per knowledge area. There will be no detailed information about passed and/or failed questions.

Q: How is the Exam score calculated?

A: The passing score for Axis Network Video Exam is 600 points out of 800, and a scaled score is used, starting at 200 points. The score per question depends on importance and difficulty level. If you fail one of the alternatives, or do not answer all, you will get 0 points. No points are deducted for incorrect questions, or if you do not answer a question.

After the exam

Q: What do I do if I fail the test?

A: If you do not pass the exam, you may retake it a minimum of fourteen days after the first attempt. If you are unsuccessful on a second attempt, you must wait a minimum of one month from the date of the second attempt to retake the Axis Network Video Exam again.

At retesting, you must pay another fee for the performance of the exam. Once you have passed the exam, you cannot retake the same exam, unless the exam objectives change. Your certification is valid for 36 months.

Q: What are the recertification policies?

A: An essential component to any certification program is its recertification requirements. Recertification demonstrates the Axis Certified Professional's commitment to remaining up to date on emerging technologies and the changes taking place in the security industry. Axis requires that certified professionals recertify their credential every 36 months.

Q: How do I receive the electronic Axis Certified Professional logo?

A: If your email was provided at registration, your electronic logo will be sent to you in a confirmation email from Axis after test appointment. For questions or concerns about receiving your logo, please email certification@axis.com.

Q: What should I do to receive my certificate?

A: In an effort to reduce our impact on the environment, Axis has opted to send only electronic copies of certificates. If your email was provided at registration, your electronic certificate will automatically be sent to your registration email address. For questions or concerns about receiving your certificate, please email certification@axis.com

Q: For how long is my certification valid?

A: 36 months

About Axis Communications

Axis enables a smarter and safer world by creating solutions for improving security and business performance. As a network technology company and industry leader, Axis offers solutions in video surveillance, access control, intercom, and audio systems. They are enhanced by intelligent analytics applications and supported by high-quality training.

Axis has around 4,000 dedicated employees in over 50 countries and collaborates with technology and system integration partners worldwide to deliver customer solutions. Axis was founded in 1984, and the headquarters are in Lund, Sweden.
