

# AXIS Camera Station Cloud Storage

Safeguard your video in the cloud

This add-on service complements your AXIS Camera Station Edge and Pro installations offering storage in the cloud, so your recordings are always available, even if your primary storage is down. Perfectly matched to Axis cameras, this easy-to-deploy service is fully maintained by Axis. Data is stored encrypted in the selected region and password-protected with two-factor authentication. Additionally, a time-based subscription buys you the right to use this continuously updated, supported service for one year on selected cameras and sensors.

- > [Safeguard your recordings off-site](#)
- > [Recorded video is easily available when needed](#)
- > [Add cloud to selected cameras/sensors](#)
- > [Multi-regional support](#)
- > [30 days retention time with 720p resolution](#)
