AXIS[®]
COMMUNICATIONS

Missing network audio? You're missing out.

With Axis network audio, you can

- > Broadcast audio content from a SIP mic, cell phone, tablet, computer, professional music streaming box, and more
- > Coordinate paging and live announcements, scheduled and event-triggered messages, and background music using a single multipurpose system
- > Schedule, manage, and update content – from anywhere
- > Enjoy flexible audio zones and content prioritization
- > Assign and revise user permissions
- > Know your speakers are working
- > Futureproof your business with audio that's flexible, scalable, and built on an open platform for easy integration with other systems

We hear you.

You want to benefit from the improved functionality and new capabilities network audio offers.

But

You've got a lot of money tied up in a legacy audio system.

Let us help.

Meet

AXIS C8110 Network Audio Bridge

Good things come in small packages.

Our network bridge is a versatile audio hub, based on open standards, that lets you connect and combine analog and digital audio systems. A single bridge unlocks the power of network audio for up to hundreds of analog speakers.

**When we said “easy,”
we meant it.**

Small and powerful

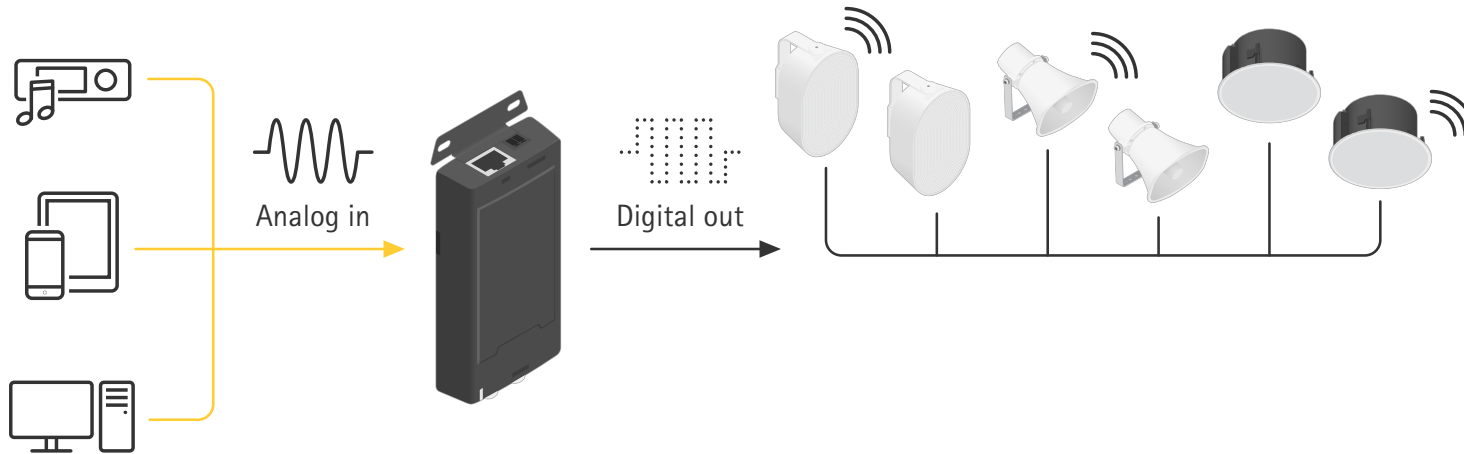

AXIS C8110 Network Audio Bridge

- > PoE – a single cable for power and connectivity
- > I/Os for buttons and relays
- > Preinstalled audio management software
- > Mic-in, line-in, and line-out
- > Preconfigured audio quality with built-in digital signal processor
- > SD card slot

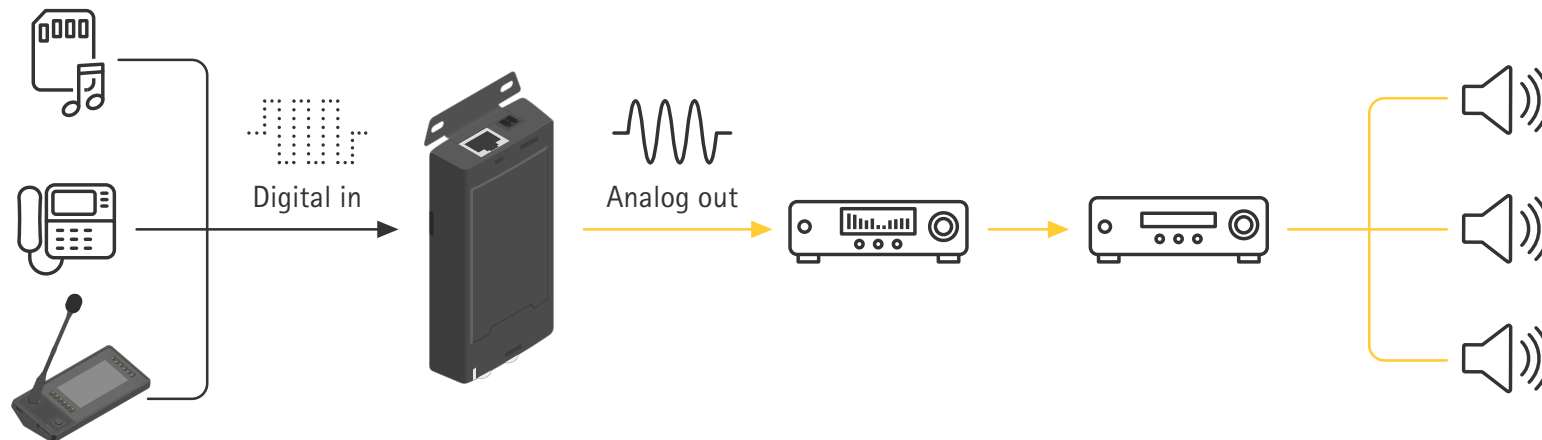

Next >

Build the solution **you need**

Analog input via 3/8" mini jack connector

Analog 'out' via RCA connectors

And passive speakers? We can get those networked as well.

AXIS C8210 Network Audio Amplifier gives you the power to design a bespoke audio solution that mixes passive speakers with network audio speakers. It's perfect for migrating existing installations to network audio, and for new installations with specific speaker form factor requirements.

Easy – and smart

Axis tools for audio migration don't just protect the value of your legacy investment. They're a cost-efficient way to give your investment new life, thanks to the power and possibility of network audio.

**They're good for your business.
Good for your bottom line.
Even good for the environment.**
