

## Affordable video surveillance storage and management solutions.

One of the major barriers businesses encounter installing a comprehensive video surveillance solution has been the complexity and high cost associated with building out network, IT and storage infrastructures to accommodate rapid expansion. Iomega® StorCenter™ Network Storage answers the call for a new class of scalable, simple and affordable video surveillance solutions that give SMBs enterprise functionality at a small business price. Built on enterprise-class EMC® technology, this feature-rich platform delivers what's missing from today's video surveillance options, the ability to offer scalable storage with advanced data protection.

Iomega's versatile StorCenter Family of network storage devices offer three flexible Video Surveillance storage and management solutions to meet a variety of SMB and distributed enterprise needs: Surveillance Storage Target, Integrated Video Management System (IVMS), and Hosted Video Surveillance Solution (HVSS).

Each solution is compatible with 8-24 Axis network cameras per location and offers Universal Plug-and-Play capability – which automatically detects cameras for easy installation. In addition, the Iomega HVSS comes already loaded with the AXIS Video Hosting System (AVHS) software.

The Iomega® Hosted Video Surveillance Solution (HVSS) is a simple, yet powerful, video monitoring and smart storage solution embedded into the StorCenter Network Storage devices that costs a fraction of the standard DVR/NVR deployment costs.

Compatible with Axis network cameras, the Iomega HVSS records in full HD, stores locally and offers low-cost access in the cloud. Tap into this virtually unlimited supply of cloud-based storage and instantly view surveillance footage from any device – all you need is an Internet connection.

Iomega® Surveillance Storage Target

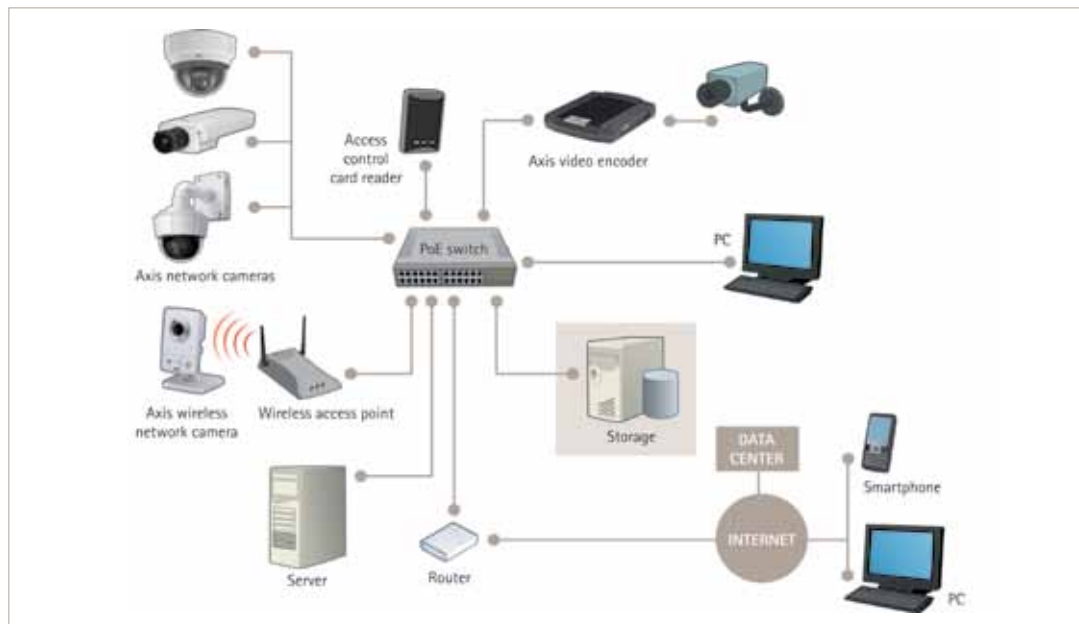

StorCenter™ Integrated Video Management System (IVMS)

Iomega® Hosted Video Surveillance Solution (HVSS)

- > **Surveillance Storage Target** is simplified and scalable network storage for your recorded or archived surveillance video
- > **Integrated Video Management System (IVMS)** blends smart storage with leading video management software and IP cameras for an integrated, low-cost video surveillance solution
- > **Hosted Video Surveillance Solution (HVSS)** leverages the power of cloud storage and the ubiquity of a browser-based VMS interface for a highly cost-effective security solution

**Built on enterprise-class EMC® technology, StorCenter Network Storage solutions offer advanced storage, security, and content sharing that is easy to use and affordable.**

- > PC, Mac® and Linux® environments
- > Capacities ranging from 2TB to 36TB
- > Fast and easy three step installation with an intuitive web-based interface
- > Lower Total Cost of Ownership relative to direct-attached storage
- > The most cost-effective shared storage certified for VMware®
- > Now with built-in Personal Cloud technology to protect and share your data from anywhere

**Why network video?**

- > Superior image quality
- > Remote accessibility
- > Easy, future-proof integration
- > Scalability and flexibility
- > Cost-effective
- > Distributed intelligence
- > Proven technology

**Why Axis?**

- > Worldwide #1 in network video, the world's leading expert
- > Proven installations across all continents
- > Broadest product portfolio in the industry
- > The largest installed base of network video products
- > Over 25 years of networking excellence

**Get the Axis picture. Stay one step ahead.**

**About Iomega**

Iomega is a worldwide leader of innovative storage solutions for small businesses, distributed enterprises, home offices, and consumers – and is a wholly owned subsidiary of EMC, the world's premier information infrastructure technology provider. Iomega has shipped more than 14 million terabytes of storage since its inception in 1980. Today, Iomega's portfolio includes industry leading network attached storage solutions, including Iomega Personal Cloud and Video Surveillance, as well as one of the industry's broadest selections of portable and desktop hard drives.
