

**Software release 2.24**

Software release 2.24 is an enhancement of the AXIS 7000 Network Document Server and replaces the previous software. All previously delivered AXIS 7000 units can be upgraded with the new software, which is available free of charge on the Axis web site. All features of the previous software are retained.

The main highlights are:

***Support for additional scanning devices***

- Avision
  - AV820C+ (A4, flatbed, ADF, b/w, grayscale and color)
  - AV830C (A4, flatbed, ADF, b/w, grayscale and color)
  - AV830C+ (A4, flatbed, ADF, b/w, grayscale and color)
- Bell & Howell
  - 730DC FB (A3, flatbed, ADF, b/w, grayscale and color)
- Canon
  - DR-3060 (B4, ADF, b/w and duplex)
  - DR-3080C (B4, ADF, b/w, grayscale, color and duplex)
- Epson
  - GT-10000+ (A3, flatbed, ADF, b/w, grayscale, color and duplex)
  - GT-30000 (A3, flatbed, ADF, b/w, grayscale, color and duplex)
- Gestetner
  - SC430DC (A3, flatbed, ADF, b/w, grayscale and color)
- Kodak
  - i50 (A4, b/w, grayscale, color and ADF)
- Nashuatec
  - SC430DC (A3, flatbed, ADF, b/w, grayscale and color)
- Rex Rotary
  - SC430DC (A3, flatbed, ADF, b/w, grayscale and color)
- Ricoh
  - Aficio IS330DC (A3, flatbed, ADF, b/w, grayscale and color)
- UMAX
  - Astra 2400S (A4, flatbed, ADF, b/w, grayscale and color)

### ***Image enhancement support***

Fujitsu IPC (Image Processing Card/Circuit) support, improves the quality of the image, which is especially important for poor originals. Supported IPC features include: Automatic Background Removal, OCR/ICR Smoothing, Dynamic Thresholding, Noise Removal, Outline Extraction, and Ball Point Pen Filtering. Supported for Fujitsu M3093/3096/3097/4097 scanners.

### ***XML enhancements***

The XML based Index and Meta data functionality, available from release 2.20, is enhanced with the following new features:

- Output section in e-mail header. This is used for sending additional information, primarily to fax servers e.g. RightFax. AXIS 7000 can now prompt for the fax number, recipient, subject, billing code and anything else the administrator has set up to be sent to the fax server in the e-mail header. See the AXIS 7000 Fax Server White Paper for more information.
- The Administrator can now specify whether several scan jobs to the same destination is allowed using the same XML data.

### ***Other enhancements***

- The e-mail body text now contains a built-in message, which can be customized by the administrator.
- PDF rotation feature is now available for scanners with a reversing duplex feeder:
  - Bell & Howell 730DC FB
  - Epson GT-10000+ and GT-30000
  - Gestetner SC430DC
  - Nashuatec SC430DC
  - Rex Rotary SC430DC
  - Ricoh Aficio IS330DC

The back page image will be rotated automatically to be shown correctly in the Adobe Acrobat Reader.
